

Buro Metro II 24/7 Chair

Operating Instructions

Adjustable seat height

While sitting in the chair, lift the front right hand lever (1) to lower the seat to the desired seat height position. To raise the seat, lift the front right hand lever (1) while supporting your own weight off the seat.

Depth adjustable seat

Pull out the right hand knob (2) and slide the seat forwards or rearwards to achieve optimum leg support and sitting position.

Ratchet height adjustable backrest

Adjust click by click by slowly pulling the back up (3) to the preferred position. To lower the back, pull up as far as possible to release and it will reset to the lowest position.

Seat tilt adjustment

To adjust the seat tilt mechanism lift the middle right hand lever (4) and tilt the seat to a comfortable position. Press the lever down to LOCK the seat tilt mechanism in your desired position.

Back tilt adjustment

To adjust the back tilt mechanism lift the rear right hand lever (5) and tilt the back to a comfortable position. Press the lever down to LOCK the back tilt mechanism in your desired position.
